

To Whom It May Concern

As a growing church we were looking to upgrade our playground. I was searching everywhere to find a playground that would fit our very small budget. What I found was, playgrounds are very very expensive. We had come to the conclusion that we were going to need to settle for a wood playground and even the biggest one was going to be a ton of money. Then I found this listing on craigslist. I still remember thinking that there was no way this could be real. His price point was way below other commercial playground companies. I contacted Kfir and he responded right away. He sent me the digital catalog that we could look through and pick out which playground we liked the best. All of them were decently priced. My next goal was to check references because I still couldn't believe that such a deal was even possible. I called three apartment complexes and they all had good reviews of Kfir and his company. I then made the pitch to our board that this was the way to go and they agreed. We ordered a HUGE playground. It has 6 slides (including a 2 story tube slide), monkey bars, a tunnel, a bridge and more! Plus 4 swings! We saved OVER 100,000 dollars. If we had spent the same amount going through a local commercial company, we would have a dinky platform play ground with maybe two slides coming off of it.

It took a while to get here but it was worth the wait. Kfir offered to get a company to put it together for us but our men's ministry decided to take on the challenge. The instruction manual was about the size of a textbook, but it was thorough. If we had any complaints at all it would be that a lot of the instructions were in very broken English having been translated poorly from Chinese, but they were able to figure it out.

Our playground has held up perfectly and our entire community loves to come and play on it!
